**REV® 1490Q**

Leader hybrid with great combination of yield potential, agronomics and broad adaptability.

- Broadly adapted across most soil types and yield environments.
- Excellent drought tolerance and solid agronomics provide dependability across most acres.
- Strong Goss’s wilt and greensnap tolerance for the West.
- In areas with heavy gray leaf spot or northern corn leaf blight, a fungicide is recommended.
- Avoid cold, wet soils to complement average stress emergence.

**YIELD ENVIRONMENTS**
- **Highly Productive**
- **Moderate**
- **Low/Stress**

**SOIL ADAPTABILITY**
- **Poorly Drained**
- **Sandy Soils**
- **Clay Soils**

**PLANTING/HARVEST**
- **Early Planting**
- **Late Planting**
- **Delayed Harvest**

**CROP ROTATION**
- **Continuous Corn**
- **Corn / Soybean**

**FUNGICIDE RESPONSE**
- **Low**
- **High**

**AGRONOMICS**
- **Stress Emergence**
- **Stalks**
- **Roots**
- **Green Snap**
- **Stay Green**
- **Drought Tolerance**
- **High pH Soil Tolerance**
- **Test Weight**
- **Husk Cover**

**DISEASES**
- **Gray Leaf Spot**
- **NCLB**
- **Goss’s Wilt**
- **SCLB**
- **S. Corn Rust**
- **Anthracnose Stalk Rot**
- **Fusarium Ear Rot**
- **Diplodia Ear Rot**
- **Giberella Ear Rot**

**CHARACTERISTICS**
- GDUs to Mid-Silk: 1260
- GDUs to Black Layer: 2530
- Plant Height: Medium Short
- Ear Height: Medium
- Ear Type: Semi-flex
- Cob Color: Pink

**HERBICIDE TOLERANCES**

**KEY**
- **Highly Suitable - Key Strength**
- **Suitable - Meets Standards**
- **Caution - Manage Appropriately**
- **Strong Caution - Limitation**
- **Rating Not Available**

**IMPORTANT:** Characteristic scores provide key information useful in selecting and managing products in your area. Information and ratings are based on comparisons with other products sold by Mycogen Seeds. Information and scores are assigned by Mycogen Seeds and are based on period-of-years testing through 2018 harvest and were the latest available at time of printing. Some scores may change after 2019 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide arrange of both climate and soil types, and may not predict future results. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision.
Optimum® AcreMax® (AM) insect protection
Optimum® AcreMax® Insect Protection system with YGCB, HX1, LL, RR2. Contains a single-bag integrated refuge solution for above-ground insects. In EPA-designated cotton growing counties, a 20% separate corn borer refuge must be planted with Optimum AcreMax products.

Optimum® AcreMax® Xtra (AMX) insect protection
Optimum® AcreMax® Xtra Insect Protection system with YGCB, HXX, LL, RR2. Contains a single-bag integrated refuge solution for above- and below-ground insects. In EPA-designated cotton growing counties, a 20% separate corn borer refuge must be planted with Optimum AcreMax Xtra products.

Optimum® AcreMax® Xtreme (AMXT) insect protection
Contains a single-bag integrated refuge solution for above- and below-ground insects. The major component contains the Agrisure® RW trait, the YieldGard® Corn Borer gene, and the Herculex® XTRA genes. In EPA-designated cotton growing counties, a 20% separate corn borer refuge must be planted with Optimum AcreMax XTreme products.

Optimum® AcreMax® Leptra® insect protection
Optimum® AcreMax® Leptra® products with AVBL, YGCB, HX1, LL, RR2. Contains a single-bag integrated refuge solution for above-ground insects. In EPA-designated cotton growing countries, a 20% separate corn borer refuge must be planted with Optimum AcreMax Leptra products.

Qrome® products are approved for cultivation in the U.S. and Canada. They have also received approval in a number of importing countries, most recently China. For additional information about the status of regulatory authorizations, visit http://www.biotradestatus.com.

*In cotton growing regions, a separate 20 percent structured refuge is still required for Refuge Advanced.

Herculex® Insect Protection technology by Dow AgroSciences and Pioneer Hi-Bred. REV® brand seed distributed by Mycogen Seeds. PowerCore and SmartStax® multi-event technologies developed by Dow AgroSciences and Monsanto. ®TM PowerCore, Roundup Ready, Roundup Ready Logo, SmartStax, SmartStax Logo, YieldGard and the YieldGard Corn Borer Design are registered trademarks of Monsanto Technology LLC. Agrisure® and Agrisure Viptera® are trademarks of, and used under license from, a Syngenta Group Company. Agrisure® technology incorporated into these seeds is commercialized under a license from Syngenta Crop Protection AG. Liberty®, LibertyLink® and the Water Droplet Design are trademarks of Bayer. Always follow IRM, grain marketing and all other stewardship practices and pesticide label directions. Roundup Ready® crops contain genes that confer tolerance to glyphosate herbicides. Glyphosate herbicides will kill crops that are not tolerant to glyphosate. B.t. products may not yet be registered in all states. Check with your local seed representative for registration status in your state. Enlist Duo and Enlist One™ herbicides are the only 2,4-D products authorized for use in Enlist crops. Always read and follow label directions. Visit Enlist.com/EnlistAhead for best management practices or more information.
